

## **DIRECTOR'S REMARK**

The Internal Quality Assurance (IQA) system of Ladok Akintola University of Technology (LAUTECH) aims to improve the quality of all the study programmes being run. The essence of IQA is to: (i) ensure that process of all teaching programmes is well documented, verifiable and assessable; (ii) facilitate access to information and thereby make it clearer and more understandable for students; and (iii) promote a process of continuous improvement in all study programmes.

Quality assurance in the university sector ensures that academic processes are of international standard. It function as a regulatory mechanism that ensure accountability and improvement, thus establishing confidence in stakeholders in a way that the inputs, processes and output of educational system fulfill the expectations or measure up to minimum standards. The quality assurance processes use evidence to check that goals are being achieved and that policies and practices are under ongoing review as part of an overall quality enhancement regime. In the university system, quality assurance is the factor that guarantees the confidence and certainty that standards and quality of a programmes are maintained and enhanced. With strong commitment to academic excellence and international standards, LAUTECH ensures that all activities are appropriately orientated towards attaining the goals that are associated with the degree programs being awarded.

The IQA system of our University plays an important role in monitoring and improving the quality of all the study programmes. The Quality assurance unit guarantees the confidence and certainty that standards and quality of programmes are being maintained and enhanced.

The university policy on IQA could be obtained through the link on this page.
